

I would like you to reject NAB's petition 04-160. NAB has long asked the Commission to relax its rules in the name of competition. Now that it has some viable competition, it requests protection. Don't let NAB have it both ways. I do a considerable amount of driving and make use of the XM instant Traffic and Weather services. It is sometimes difficult going through all the local radio stations to find one that has the information when you need it.
Thank You,

Charles Vartanian
